DETAILED ACTION

1. Applicant's Application filed on October 23, 2003 has been reviewed.
2. Claims 1-35 are presented for examination.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I: Claims 1-9 and 14-19, drawn to a method for eliminating the need for each application to create duplicate principal data.

Group II: Claims 10-13 and 20-35, drawn to a method for finding principals based on an identity reference to a principal or an identity claim that uniquely identifies the principal on a computer system.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group I has separate utility such as a method for eliminating the need for each application to create duplicate principal data while invention Group II is a method for finding principals based on an identity reference to a principal or an identity claim that uniquely identifies the principal on a computer system. See M.P.E.P. '806.05(d).

Art Unit: 2165

Because these inventions are distinct for the reasons given above, therefore, restriction for examination purposes as indicated is proper.
